angelframe

MADE IN EU design by KD patented

information

IT angelframe rimane discreto ed invisibile nella parte posteriore delle vostre stampe digitali di grande formato, dandovi così la possibilità di esporre le vostre presentazioni senza cornici laterali. gli angoli vengono avvitati direttamente, e quindi in modo decisamente sicuro, sui profili; per questo motivo non c'è bisogno di tagliare i profili a 45°. dadi e clip per banner possono essere inseriti nel profilo anche dopo aver effettuato il montaggio. il bordo del banner viene agganciato alla parte posteriore del profilo: il fissaggio posteriore vi permette di nascondere facilmente eventuali irregolarità del banner. il montaggio di angelframe vi farà risparmiare tempo e denaro: lo stesso cambio del banner, grazie al design e alla funzionalità intelligente, è facile, veloce e attuabile senza l'utilizzo di utensili.

DE angelframe hält sich bei den large-formats dezent unsichtbar im hintergrund und präsentiert ihr big-format rahmenlos. die ecken werden direkt und damit besonders stabil mit dem profil verbunden. profile können gerade und ohne gehrung geschnitten werden. die nutsteine lassen sich einklicken, ebenso wie die bannerclips, d.h. auch schon montierte rahmen können noch ergänzt werden. der bannerrand wird über das rahmenprofil gezogen und bleibt unsichtbar. ungenauigkeiten bei zuschnitt oder säumung fallen damit nicht mehr auf. insgesamt ist die montage zeit- und kostensparend, ebenso der banner-austausch ist durch das clevere design unkompliziert und ohne werkzeug jederzeit möglich.

EN angelframe is backstage when it comes to presenting large-formats. the structure holds your banner framelessly. the edges are directly and firmly connected to the extrusions so it is not necessary to mitre the profiles. the threads for wall fixing and the banner clips can be clicked in to place even after mounting. the banner seam is pulled over the frame profile, thus hiding imprecise cuts or seams. all in all, the mounting saves time and money, the banner exchange is easy and does not require tools and is possible at anytime.

faltenfreie eck-montage: cleveres design auch hier. die eckverbinder haben eine nut, in die sie einfach die bannerecken ziehen. so spannen sie ihr banner im nu faltenfrei und sauber!

crease free mounting of the angles: the clever design provides a solution as well. all the edge connectors come with a slot where you simply pull through the banner ends. thus you tighten your banner quickly crease free and neat!

like monsterframe angel has also different possibilities to fix the banner. see p. 197 for more details

il connettore angelframe, per composizioni modulari, deve essere fissato ad un gancio murale. i profili risulteranno così connessi grazie a questo accessorio. in caso di utilizzo del connettore AFCON2, considerare 10mm in meno, per ogni connettore, sulla lunghezza dei profili.

der connector für die modulare gestaltung muss an einer wandhalterung angebracht werden. die profile werden mittels connector verbunden. bei verwendung der verbinder AFCON2 muss die profillänge je verbinder um 10mm gemindert werden.

the connector for modular design of angelframe must be mounted directly to the wall mounting support. the profiles can then be connected directly. when using connectors AFCON2 calculate 10mm less profile length for each connector used.

leoframe

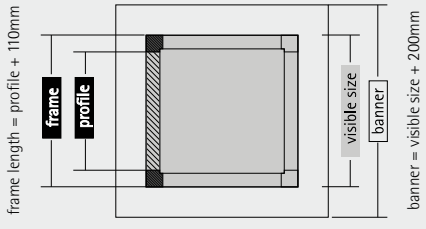

MADE IN EU design by KD

IT leoframe è un sistema a scomparsa, ideale per interni ed esterni, particolarmente robusto e che può essere utilizzato come sistema mono- e bifacciale. i banner vengono fissati lateralmente sul profilo grazie ad un listello decorativo. affinchè leoframe possa essere utilizzato anche come sistema autoportante, in loco durante il montaggio sono da prevedere strutture ausiliarie. le traverse, con un angolo di 90° o 45° possono essere aggiunte alla struttura anche dopo l'installazione del sistema, senza doverlo rismontare. grazie a questi connettori, leoframe può essere utilizzato anche per realizzare strutture tridimensionali.

DE leoframe für den innen- und aussenbereich ist ein besonders stabiles rahmenloses systems. sie können es ein- oder doppelseitig einsetzen. die banner werden mit einer dekorschiene seitlich befestigt. für die freistehende verwendung sind bauseitig entsprechende strukturen vorzusehen. traversen können im 90° oder 45°-winkel jederzeit auch nachträglich ohne demontage des rahmens eingesetzt werden. dank dieser verbinder kann leoframe sogar für dreidimensionale strukturen verwendet werden.

EN leoframe is a very stable frameless system for in or outdoor. you can use it both single or double-sided. banners are mounted with a lateral fixing lace. for the freestanding structures the required mounting must be provided by customers. cross beams can be mounted with 90° or 45° anytime without any disassembling of the frame. thanks to the special connector design even 3 dimensional structures are possible.

MADE IN EU design by KD

IT il meccanismo avvolginastro: in abs infrangibile, si monta senza l'utilizzo di viti o colle, mentre senza bisogno di ulteriori utensili il raccordo a 4 direzioni rende possibile l'aggiunta di altri stopper. tutte le parti visibili del raccordo e degli agganci sono senza spigoli, con forme rotondeggianti: per evitare ogni possibile ferita o danno agli abiti. il meccanismo avvolginastro in abs viene inserito nel tubo grazie alle scanalature laterali e al sistema autobloccante. per cambiare il meccanismo basta sganciare le molle grazie ai bottoncini laterali ed estrarlo.

DE die gurtkasette: aus bruchsicherem abs ohne schrauben und klebstoff montiert. an das 4-wege-gehäuse können sie weitere stopper anschliessen ohne zusätzliche adapter. alle hervorstehenden teile und sichtbaren kanten sind gerundet: keine verletzungsgefahr, kleidung kommt nicht zu schaden. das abs-gurtgehäuse wird in den pfosten eingeschoben und rastet sicher ein. zum austausch die verschlussfeder einfach per knopfdruck öffnen und gehäuse herausziehen.

EN the housing: made of breakproof abs plastics mounted ungummed and without screws. connect more stoppers to the 4-way housing without further adaptor necessary. all jutting parts and edges are rounded: no risk of injury, no damage to clothing. the housing made of abs plastics is simply inserted into the post and locks in safely. for changing just press the button to open and pull out the housing.

il cambio del maccanismo con nastro è possibile in ogni momento. a prova di manomissioni grazie al bottoncino di sicurezza nella parte inferiore del gancio.

austausch der gurtkassetten jederzeit ganz einfach möglich. manipulationsgeschützt dank sicherungsknopf.

quick and easy exchange of the housings at anytime. tamper-proof thanks to the security button.

estensione totale: nastro di 3 mt di lunghezza

vollauszug mit 3m gurtlänge

complete extension of webbing to 3m in length

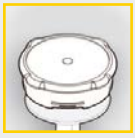

fissaggio sicuro grazie all'inserimento del gancio nella scanalatura. il bottoncino inferiore rende impossibile lo sganciamento accidentale del nastro.

sichere befestigung durch einschubhalterung mit einrast-sicherung. sicherungsknopf schützt vor ungewolltem lösen der gurte.

fasten securely the webbing by inserting it to the housing. security button prevents accidental opening.

A

filetto per accessori: foro filettato M8 per tutti gli accessori.

das gewinde: integriertes M8 gewinde für alle accessoires.

thread for accessories: integrated M8 thread for all accessories.

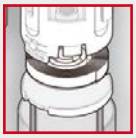

B

il sistema frenante: integrato nel meccanismo, il freno regola la sua azione frenante in base alla velocità di rotazione dell'avvolginastro. il nastro viene riavvolto con la stessa velocità dall'inizio alla fine. si evitano così ferite alle mani e alle dita a causa di un riavvolgimento incontrollato e troppo veloce.

die bremse: die eingebaute fliehkraftbremse passt ihre bremsstärke an die rotationsgeschwindigkeit des mechanismus an. das gurtband wird von anfang bis ende mit gleicher geschwindigkeit eingezogen. keine hand- und fingerverletzungen durch unkontrollierte ausschläge des bandes beim einzug.

the brake: the integrated brake adjusts its force according to the rotation speed of the mechanism. the tape is pulled back with the same speed over the full length. no sudden punches of the tape and no risk to injure hand or fingers.

C

la molla: appositamente per lo stopper abbiamo realizzato una speciale molla piatta in acciaio, con gli angoli arrotondati. il suo effetto si svolge linearmente su tutta la lunghezza del nastro. ciò significa che le colonnine rimangono stabili anche quando il nastro viene utilizzato per tutta la sua lunghezza e che il nastro stesso rimane perfettamente in tensione anche se usato solo per parte della sua lunghezza. con stopper avete la possibilità di utilizzare l'intera lunghezza di 3m in modo ottimale.

die feder: eigens für stopper haben wir eine stahl-flachfeder mit abgerundeten kanten entwickelt. ihre federwirkung verläuft linear. der zug auf den gurt wirkt immer gleichmässig. das heisst für sie: kein umfallen der pfosten durch zu starken zug bei vollauszug und ausreichende spannung auch bei geringem gurtauszug. mit stopper nutzen sie die gesamte gurtlänge von 3m optimal.

the spring: especially for stopper we designed a steel flat spring with linear resilience. the tape is under a constant tension. that means no toppling of the posts when the tape is completely moved out and enough tension even with little pullout to keep the tape straight. with stopper you use the full tape length of 3m.

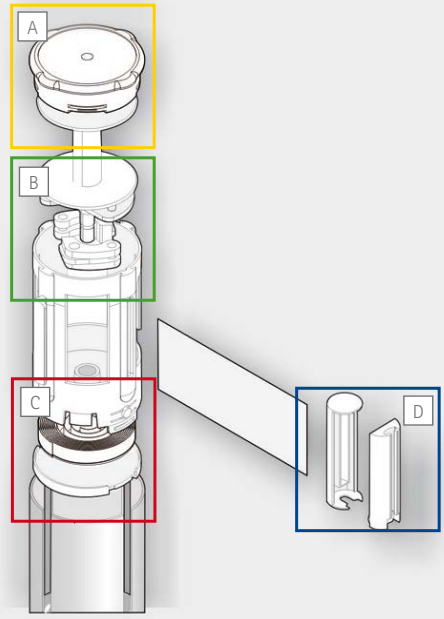

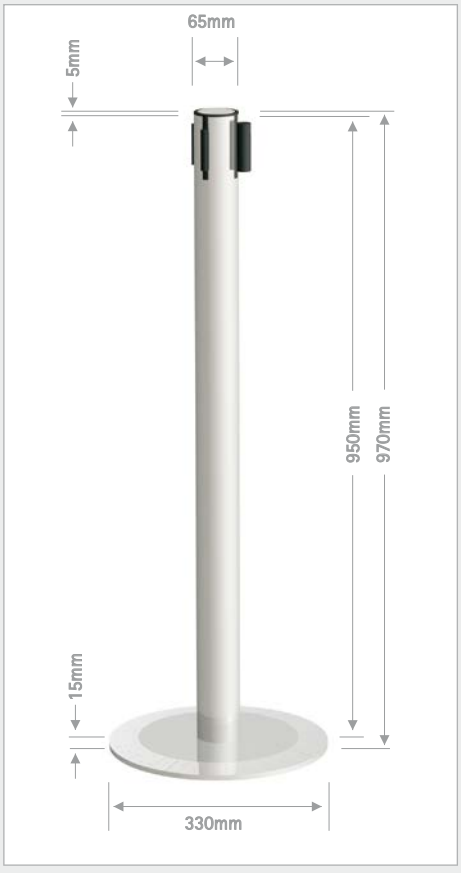

D

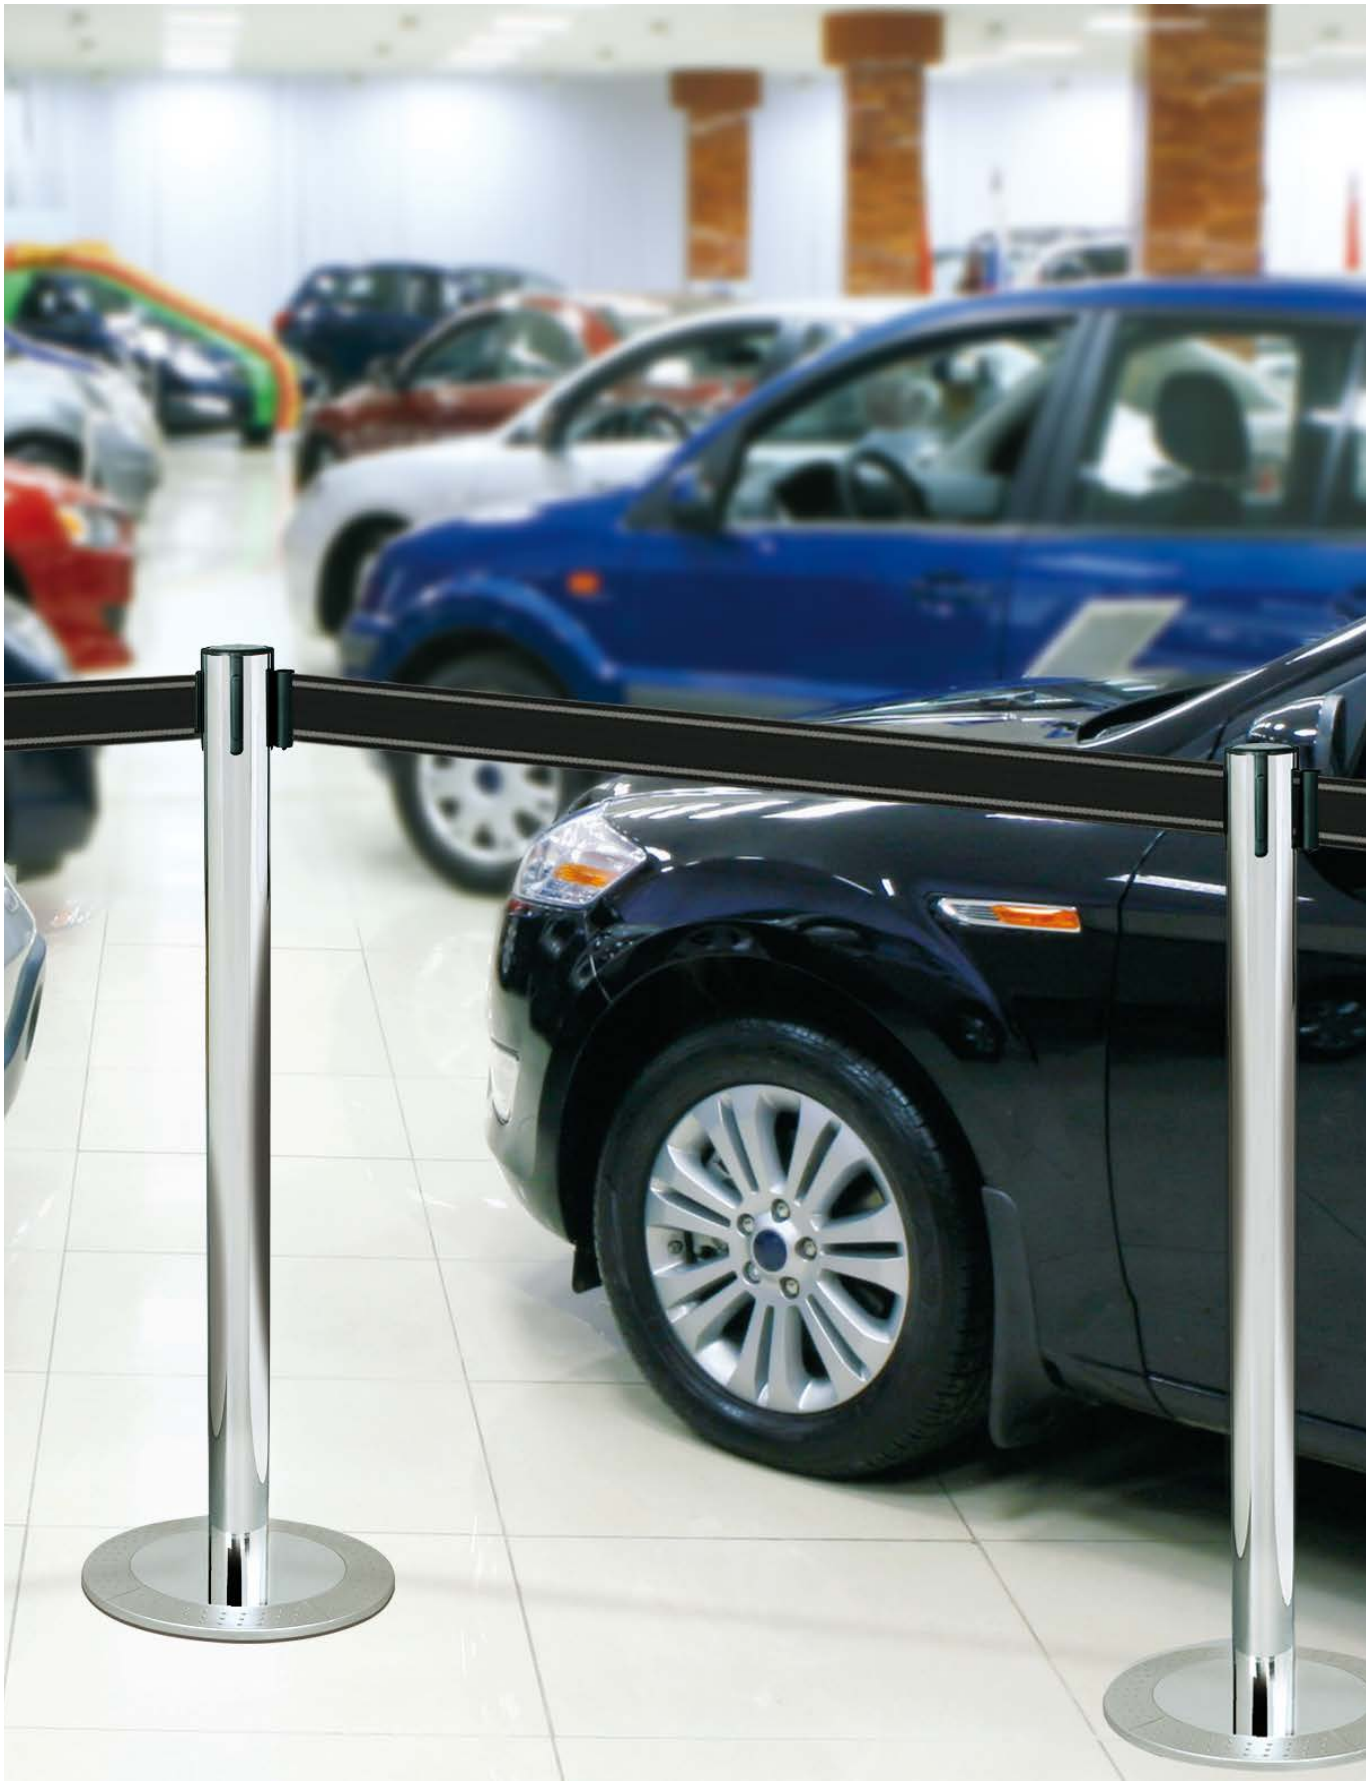

il gancio di sicurezza: ogni nastro stopper è dotato di uno speciale gancio con una chiusura di sicurezza. il gancio si incastra sul raccordo del meccanismo ed impedisce che il nastro si stacchi inavvertitamente. per aprirlo basta premere leggermente il bottoncino. tale chiusura è standard in tutti i nastri disponibili. nelle prossime pagine troverete ulteriori vantaggi che vi offre il sistema stopper.

der verschluss: jedes gurtband hat einen verschluss mit sicherung. diese sicherung rastet ein und verhindert unbeabsichtiges auslösen oder herausgleiten. zum öffnen genügt ein knopfdruck. diese sicherung ist standard bei allen gurtausführungen. noch mehr vorteile des stoppersystems finden sie auf den nächsten seiten.

the locking: every tape has a tamper-proof locking. this locking snaps in and prevents from unintended opening or sliding out. to open just press the button. this locking comes with all tape ends as a standard. find more stopper advantages on the following pages.

IT attacco a parete stopper: con l'attacco a parete avete a disposizione lo stesso raccordo a 4 direzioni delle colonnine a terra, ma non solo: il nastro infatti potrá fuoriuscire dall'attacco a parete sia sul fronte che di lato, ma anche dalla quarta via d'uscita, posteriore, nel caso in cui l'attacco a parete venisse montato in un luogo nascosto dietro ad un muro o ad un mobile, per esempio. l'attacco a parete insomma si fa notare solo se serve e nel caso in cui debba essere utilizzato, altrimenti rimarrá nascosto. completate il fissaggio del nastro montando alla parete l' attacco „stopper clip „ oppure agganciatelo al meccanismo di un` altra colonnina stopper.

IT l´innovativa segnaletica signcode colors offre un sistema direzionale a colori integrato nella cornice, adatti per indicatori a bandiera verticali o orizzontali. oltre ai 4 colori standard della segnaletica di sicurezza, diamo la possibilità di scegliere fra ulteriori 4 colori. come già previsto dal sistema signcode, anche in questo caso sono disponibili le due versioni: con pannelli in alluminio per stampa diretta o con un protettivo trasparente in PS, che permette l´inserimento di stampe realizzate su supporto cartaceo. entrambi i sistemi sono a prova di manomissione, ma permettono comunque una semplice e veloce sostituzione d'informazioni evitando di smontare l'intera targa. signcode colors: segnaletica innovativa con un moderno sistema direzionale a colori.
